ABOUT THE COMPANY

Multi Mitra Guna (MMG) is a versatile company specializing in IT System integration, OT system integration, electro-mechanical engineering, and infrastructure engineering. Our commitment to excellence drives us to deliver high-quality solutions by combining industry expertise with cutting-edge technology tailored to meet client needs.

MMG provides expert services in electro-mechanical engineering, construction, fabrication and infrastructure development. Whether it's power systems and industrial automation, our experienced team ensures each project is completed efficiently and to the highest standards.

We specialize in IT (Information Technology) and OT (Operational Technology) integration, bridging the gap between enterprise networks and industrial control systems. Our expertise includes:

- Hybrid Infrastructure & Data Center, Enterprise Networking & Connectivity, Cybersecurity & Digital Resilience, Smart Workplace & End User Technology, Smart Building & Surveillance Systems
- SCADA & IoT Solutions – Real-time monitoring and automation for industrial processes.

We offer end-to-end facilities maintenance services to keep buildings and infrastructure in optimal condition. From preventive maintenance to repair and equipment replacement, we ensure smooth operations and long-term asset longevity.

At MMG, our commitment to quality and innovation sets us apart. Whether for construction, IT/OT system integration, or facilities management, we deliver exceptional service and reliability in every project

Contact us today to discuss how we can address your needs with excellence and efficiency.

WHY CHOOSE US

Service Excellence

CERTIFIED AND EXPERIENCED ENGINEERS DELIVERING RELIABLE IT, OT, AND INFRASTRUCTURE SOLUTIONS.

COMMITTED TO QUALITY, PROFESSIONALISM, OPERATIONAL SAFETY, AND SUSTAINABLE BUSINESS PRACTICES.

COMPREHENSIVE PROJECT EXECUTION FROM DESIGN, IMPLEMENTATION, INTEGRATION, TO MANAGED SUPPORT SERVICES.

CERTIFIED WITH ISO 9001, ISO 14001, AND ISO 45001 TO ENSURE QUALITY, SAFETY, AND OPERATIONAL EXCELLENCE.

Business Value

Free Consultation

Discuss your business challenges with our experts and discover tailored technology solutions

Integrated IT & OT Expertise

We delivers reliable IT / OT solutions and electro-mechanical solution that enhance efficiency, reliability, and long-term business success.

MULTI MITRA GUNA

OUR EXPERT TEAMS

Our specialized team is structured into four main business units, each focused on delivering excellence in its respective domain.

**IT SYSTEM
INTEGRATOR**

**OT SYSTEM
INTEGRATOR**

**ELECTRO-MECHANICAL
ENGINEERING**

**INFRASTRUCTURE &
CIVIL ENGINEERING**

We continuously enhance our expertise through ongoing learning and industry certifications, ensuring we stay at the forefront of innovation and excellence.

**OUR TEAM CONSIST OF HIGHLY CERTIFIED
AND EXPERIENCED PROFESSIONALS,
DEDICATED TO DELIVERING INNOVATIVE AND
PARTNERSHIP-DRIVEN SOLUTIONS**

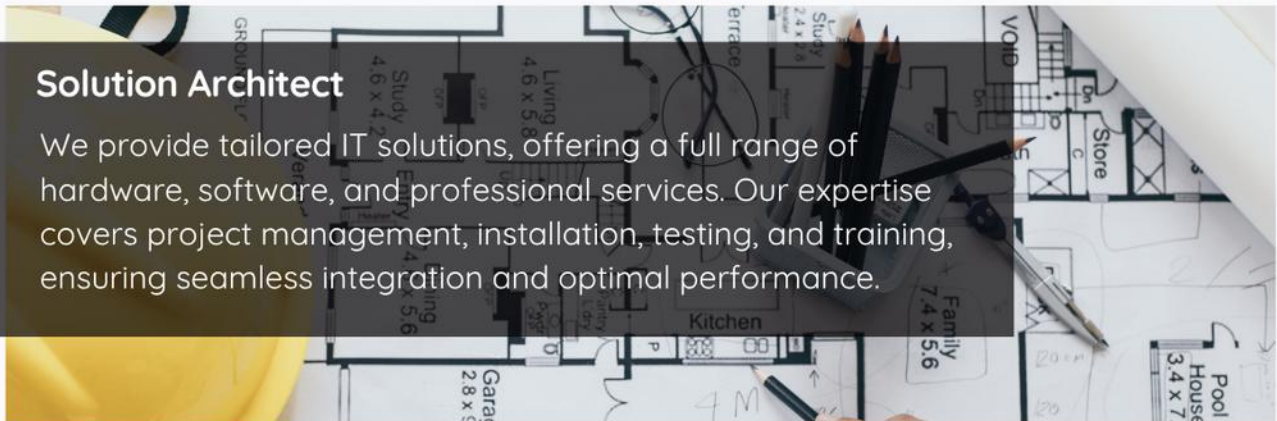

IT SYSTEM INTEGRATOR

We specialize in delivering integrated IT solutions that unify infrastructure, networking, cybersecurity, collaboration, and operational systems into secure, scalable, and efficient digital ecosystems — enabling organizations to accelerate transformation and improve business operations.

Solution Architect

We provide tailored IT solutions, offering a full range of hardware, software, and professional services. Our expertise covers project management, installation, testing, and training, ensuring seamless integration and optimal performance.

Managed Service & Maintenance

We provide comprehensive managed services and maintenance for IT systems, ensuring maximum uptime, security, and efficiency. Our services including: 24/7 Monitoring Support, Preventive & Corrective Maintenance, Network & Security Management

Custom In-House Software

We develop custom in-house software designed to meet your unique business requirements with scalability, security, and efficiency in mind.

MULTI MITRA GUNA

OUR SERVICES

Hybrid Infrastructure & Data Center

Building resilient digital foundations through scalable compute, storage, virtualization, cloud, and disaster recovery solutions that ensure business continuity and operational efficiency.

Enterprise Networking & Connectivity

Delivering secure, high-performance network infrastructures that connect people, systems, branches, and critical operations with seamless reliability.

Cybersecurity & Digital Resilience

Protecting organizations with proactive security solutions that safeguard data, systems, and operations against evolving cyber threats.

Smart Workplace & End User Technology

Empowering modern workplaces with intelligent end-user solutions that enhance collaboration, productivity, and seamless digital experiences.

Smart Building, IoT & Surveillance Systems

Integrating intelligent building systems, IoT platforms, and operational technologies to create safer, smarter, and more efficient environments.

MULTI MITRA GUNA

OUR SERVICES

Hybrid Infrastructure & Data Center

We provide end-to-end hybrid infrastructure solutions designed to help organizations build resilient, scalable, and future-ready digital foundations. Our services cover data center infrastructure, server and storage deployment, hyperconverged systems, virtualization platforms, backup and disaster recovery, as well as private and hybrid cloud integration. By combining performance, security, and operational efficiency, we enable businesses to modernize their infrastructure while ensuring high availability, business continuity, and seamless digital transformation.

Core Infrastructure Solutions

- Rack Servers
- Blade Servers
- SAN / NAS Storage
- Hyperconverged Infrastructure
- Backup Appliances
- Data Center Racks
- UPS Systems
- Cooling Systems
- Network Cabinets
- Disaster Recovery Infrastructure

Cloud & Virtualization Solutions

- VMware Virtualization
- Hyper-V and Alternative Virtualization
- Private Cloud
- Hybrid Cloud Integration
- Cloud Backup
- Disaster Recovery Replication

Professional Services

- Infrastructure Assessment & Planning
- Installation & Deployment
- Preventive Maintenance
- Migration Services
- Infrastructure Health Check
- Managed Support Services

TECH PARTNER

"Empowering organizations with resilient infrastructure solutions that drive operational excellence and long-term digital growth."

MULTI MITRA GUNA

OUR SERVICES

Enterprise Networking & Connectivity

We deliver secure, scalable, and high-performance networking solutions that enable seamless connectivity across corporate offices, industrial environments, remote branches, and mission-critical operations. Our expertise covers enterprise network infrastructure, wireless connectivity, internet backbone, fiber optic deployment, and network security integration. By combining reliable hardware platforms with professional implementation services, we help organizations build agile and resilient network ecosystems that support operational growth and digital transformation.

Core Networking Solutions

- Enterprise Switches
- Core Routers
- Firewall Appliances
- Wireless Access Points
- Point-to-Point Wireless Systems
- Fiber Optic Infrastructure
- Network Cabinets / Racks
- Structured Cabling
- Load Balancers
- Internet Redundancy Solutions

Scope of Services

- Enterprise LAN/WAN Infrastructure
- Wireless Network Solutions
- Fiber Optic Infrastructure
- SD-WAN Solutions
- Network Security Integration
- Branch Connectivity
- Network Monitoring Solutions

Professional Services

- Network Assessment & Planning
- Installation & Deployment
- Preventive Maintenance
- Managed Support Services
- Enterprise Wi-Fi Deployment
- Fiber Optic Installation

TECH PARTNER

"Our networking portfolio includes enterprise-grade hardware solutions designed to ensure performance, availability, and secure connectivity."

MULTI MITRA GUNA

OUR SERVICES

Cybersecurity & Digital Resilience

We help organizations strengthen their security posture by delivering comprehensive cybersecurity solutions that protect critical infrastructure, digital assets, and business operations from evolving cyber threats. Our expertise covers network security, endpoint protection, identity management, security monitoring, backup resilience, and incident response capabilities. By integrating advanced security technologies with proactive services, we enable organizations to maintain operational continuity, regulatory compliance, and long-term cyber resilience.

Core Cybersecurity Solutions

- Next Generation Firewalls
- Endpoint Security Platforms
- VPN Solutions
- Multi-Factor Authentication
- Secure Web Gateways
- Email Security Gateways
- SIEM Platforms
- Backup Security Systems
- Access Control Security
- Data Protection Solutions

Scope of Services

- Network Security Solutions
- Endpoint Protection
- Firewall & Perimeter Security
- Identity & Access Management
- Security Monitoring Solutions
- Email Security
- Backup Security Integration

Professional Services

- Device Installation & Deployment
- Preventive Maintenance
- Vulnerability Assessment
- Security Troubleshooting
- SIEM Managed Service

TECH PARTNER

SentinelOne

FORTINET

ivanti

SOPHOS

"We deliver end-to-end cybersecurity services from assessment and deployment to continuous monitoring and long-term protection strategies."

MULTI MITRA GUNA

OUR SERVICES

Smart Workplace & End User Technology

We empower modern organizations with intelligent workplace technology solutions that enhance productivity, collaboration, and operational efficiency. Our services cover end-user computing devices, collaboration platforms, communication systems, workspace technology, and managed support services designed to create seamless digital experiences for employees and customers. By integrating reliable hardware, software, and support services, we help businesses build agile, connected, and future-ready work environments.

Core End Device Solutions

- Business Laptops & Desktops
- Workstations
- Printers & Scanners
- Meeting Room Systems
- Interactive Displays
- Video Conferencing Equipment
- IP Phones System
- Collaboration Platform
- Digital Signage Solutions
- Endpoint Management Systems

Scope of Services

- End User Computing Solutions
- Enterprise Printing Solutions
- Collaboration Technology
- Unified Communication Systems
- Video Conferencing Solutions
- Workspace IT Infrastructure
- Device Lifecycle Management

Professional Services

- Device and OS Deployment Services
- Office Relocation IT Support
- IT Asset Refresh Programs
- User Support Services
- Helpdesk Support
- Device Troubleshooting

TECH PARTNER

"We provide end-to-end workplace technology services from procurement and deployment to lifecycle management and ongoing technical support."

MULTI MITRA GUNA

OUR SERVICES

Smart Building, IoT & Surveillance Systems

We deliver integrated smart building and security solutions that enhance safety, operational visibility, and facility efficiency across commercial, industrial, and critical environments. Our expertise covers intelligent surveillance systems, access control, fire safety systems, IoT-based monitoring, and centralized security management platforms. By combining advanced technologies with reliable infrastructure and professional implementation services, we help organizations create safer, smarter, and more connected facilities.

Core Smart Building & Security

- IP CCTV Systems
- Video Management Systems (VMS)
- Access Door Controllers
- Biometric Access Systems
- Fire Alarm Control Panels
- Fire Detection Sensors
- Public Address & Emergency Systems
- ANPR Cameras
- Smart Parking Systems
- Centralized Monitoring Platforms

Scope of Services

- CCTV & Video Surveillance Systems
- Access Control Solutions
- Fire Alarm & Fire Suppression Systems
- Building Security Systems
- ANPR & Smart Parking Solutions
- IoT Monitoring Systems
- Command Center Integration
- Visitor Management Systems
- Environmental Monitoring

Professional Services

- Device Installation & Deployment
- Preventive Maintenance
- CCTV Site Survey
- Control Room Setup
- Device Troubleshooting

TECH PARTNER

"Our integrated security and building solutions are designed to improve safety, monitoring capabilities, operational control, and facility efficiency."

OT SYSTEM INTEGRATOR

2

Operational Technology (OT) focuses on controlling and monitoring physical processes in industries through process control systems, sensors, and machine-integrated hardware. Meanwhile, Information Technology (IT) manages data, communication, and business applications that support decision-making and automation.

By integrating IT with OT, we enable real-time data exchange, predictive analytics, and enhanced automation. Our custom software solutions bridge these systems, ensuring:

- Seamless IT & OT Convergence – Secure and efficient communication between enterprise systems and industrial controls.
- Process Automation & Optimization – Intelligent workflows to improve productivity and reduce downtime.
- Advanced Monitoring & Analytics – Real-time insights for predictive maintenance and operational efficiency.
- Scalable & Secure Infrastructure – Robust software tailored to industry-specific needs.

With our expertise in custom software development and system integration, we empower industries with smart, connected, and efficient operations.

Our OT Solution Capabilities

We Provide OT Solutions:

- Industrial Control System (ICS)
- PLC and Sensors
- Smart Robotics
- Surveillance Cameras
- Environment Monitoring
- SCADA System
- Manufacturing Execution System (MES)
- Building Management System (BMS)
- Alarm and Facility Management
- Production Plant Information Systems

These OT solutions are widely used in industries such as manufacturing, energy, transportation, and other sectors to control operations and monitor performance effectively.

MULTI MITRA GUNA

OUR SERVICES

Panel Building

High-performance panels, delivered on time and on budget.

Automation System Integration

high-performance automation solutions make connecting your machines, data and people simple

Smart Robotics

Intelligent robotics engineered for the next generation of industry.

Building Management System

Total control of your facility, integrated into a single touchpoint. Connecting lighting, HVAC, and security into one intelligent ecosystem

Instrumentation and SCADA

Stabilizing your plant, safeguarding your bottom line and create ultimate precision in measurement, the absolute control in automation

MULTI MITRA GUNA

OUR SERVICES

Panel Building

Scope of Services

We specialize in designing and manufacturing high-quality control panels tailored to meet diverse industrial needs. Our custom-built panels ensure seamless integration, safety, and optimal performance across various applications.

Our Expertise Includes:

- Control Panels – Engineered for precise automation and process control.
- Power Distribution Panels – Efficient power management for industrial systems.
- PLC & HMI Panels – Smart automation with intuitive control interfaces.
- Motor Control Centers (MCC) – Reliable motor operation and protection.
- Custom Panel Fabrication – Tailored solutions to match industry-specific requirements.
- Wiring & Integration – High-quality assembly for seamless connectivity.
- Testing & Quality Assurance – Rigorous testing for durability and compliance.

With our expertise in panel design, engineering, and manufacturing, we provide robust, scalable, and efficient solutions for industries such as manufacturing, energy, transportation, and building automation.

BRAND EXPERIENCES

SIEMENS

ABB

Schneider
Electric

"From Concept to Commissioning Sub-headline: A systematic approach to delivering high-performance industrial solutions"

MULTI MITRA GUNA

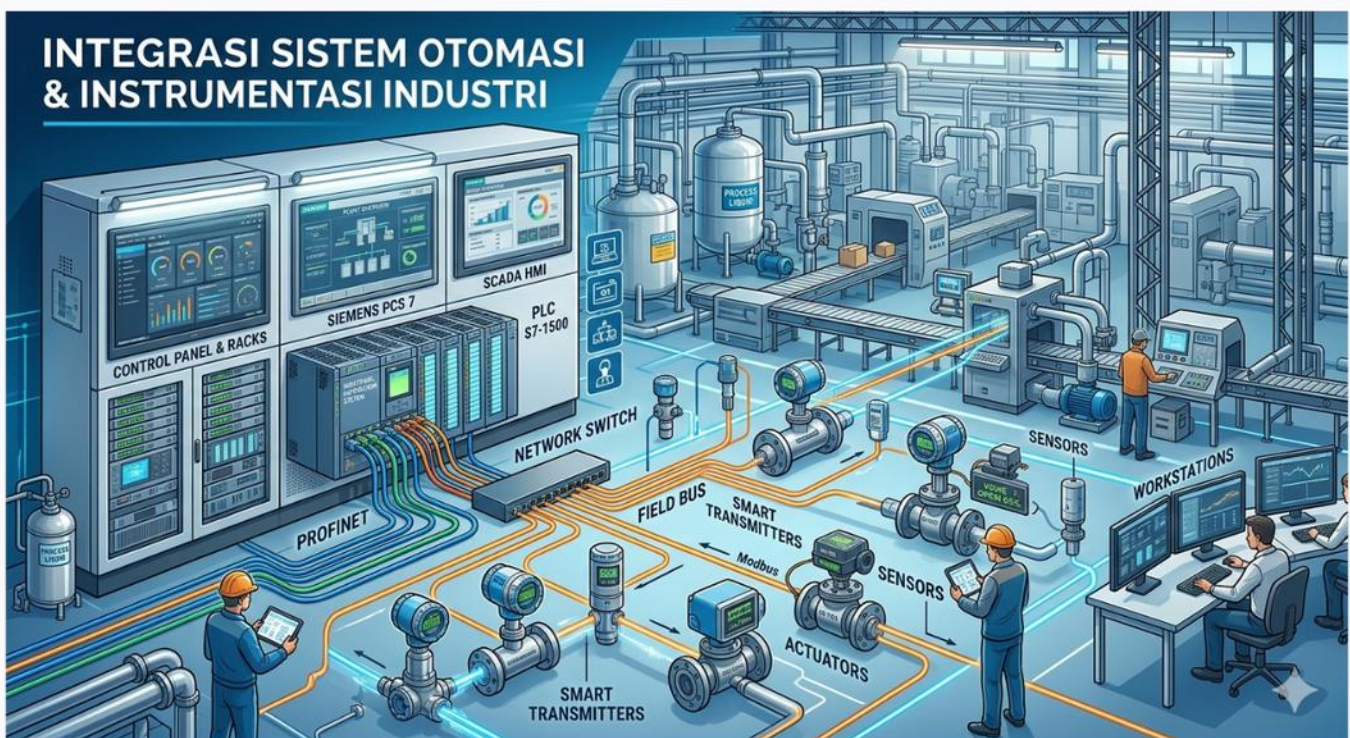

OUR SERVICES

Automation System Integration

We act as the bridge between process technology, hardware vendors, and your operational team. Their scope of service explicitly outlines their engineering liabilities, technical boundaries, and project management duties.

Scope of Services

- Engineering & Design: Utilizing advanced CAD software to create precise electrical schematics and 3D layouts tailored to client specifications.
- Component Sourcing: Partnering with global industry leaders (e.g., Schneider, ABB, Siemens) to ensure reliability and long-term part availability.
- Precision Assembly: Expert technicians perform meticulous mounting and wiring, ensuring neat cable management for easy maintenance.
- Factory Acceptance Test (FAT): Rigorous pre-delivery testing, including point-to-point checks and functional simulations under load.

BRAND EXPERIENCES

SIEMENS**Schneider**
Electric **MITSUBISHI**
ELECTRIC **SMC**

"From Concept to Commissioning Sub-headline: A systematic approach to delivering high-performance industrial solutions"

MULTI MITRA GUNA

OUR SERVICES

Smart Robotics

Service & Collaborative Industrial Robots

Relieve employees from repetitive, high-precision, or hazardous tasks by introducing industrial robots, AMRs, and cobots.

- Transport heavy inventory in warehouses with AMRs
- Handle adhesive application or welding with cobots
- Reduce workplace strain by automating heavy lifting and repetitive tasks

Industrial IoT & Connectivity

Create a smart factory ecosystem where machines, devices, and sensors are connected for real-time insights and centralized monitoring.

- Track forklift health and location with IoT sensors
- Connect all machines to a single monitoring dashboard
- Monitor cycle times and pinpoint bottlenecks instantly

BRAND CAPABILITIES

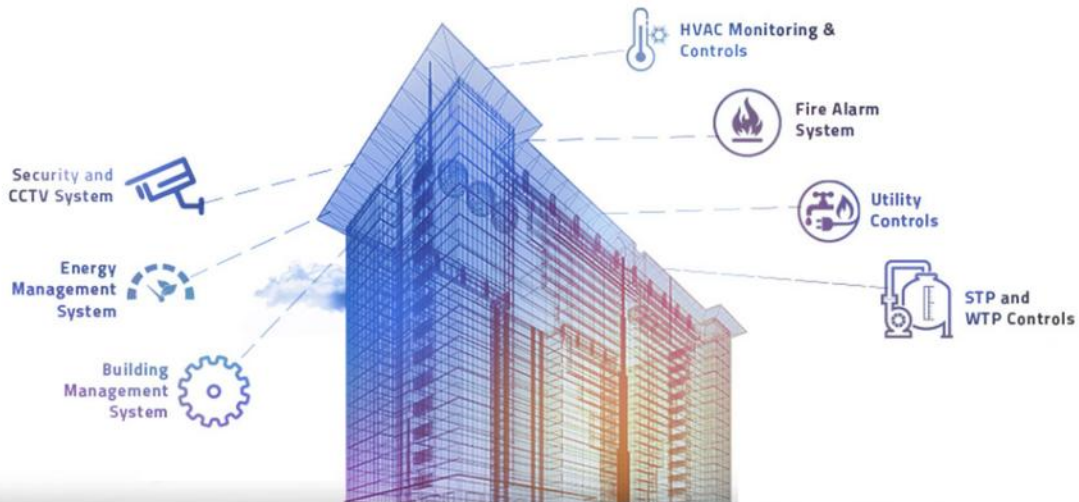

"From Concept to Commissioning Sub-headline: A systematic approach to delivering high-performance industrial solutions"

OUR SERVICES

Building Management System

Building Management System

provide systems that monitor and control a building's operations. These systems can improve efficiency, reduce costs, and ensure compliance with regulations

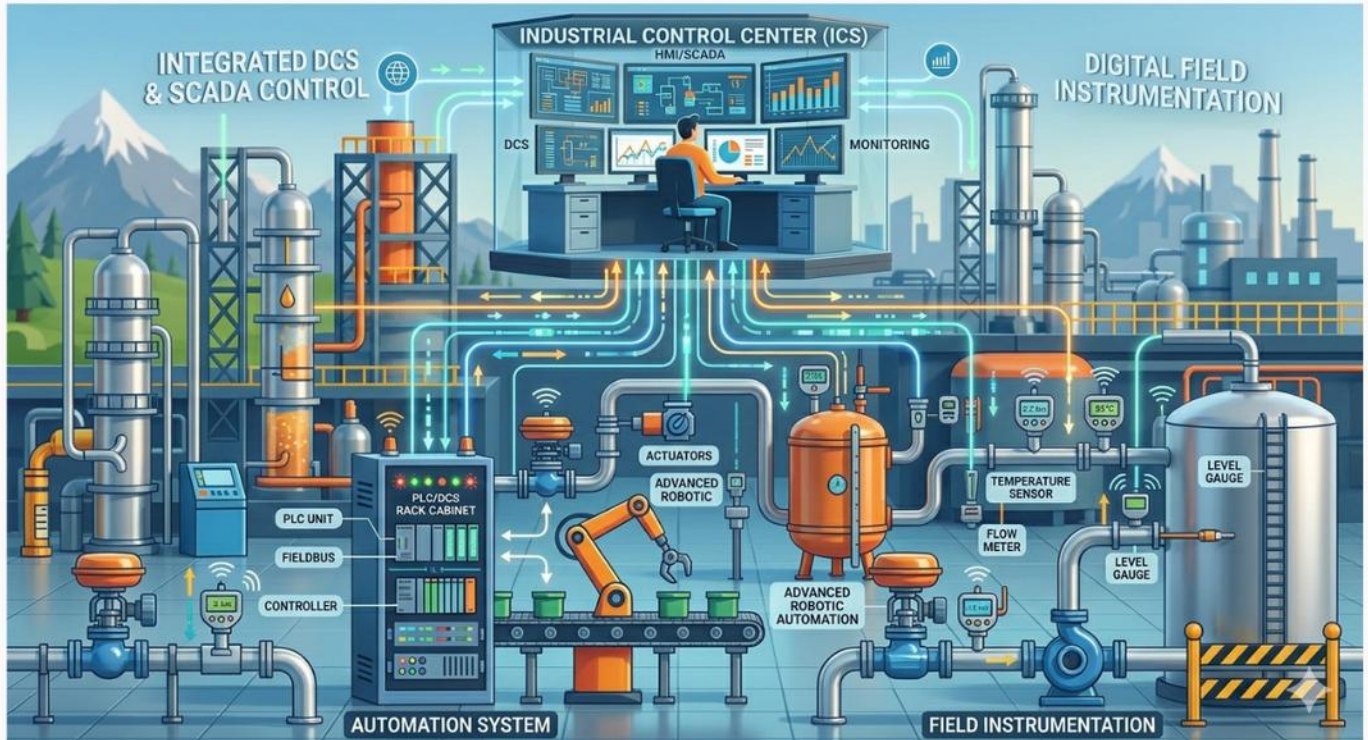

"From Concept to Commissioning Sub-headline: A systematic approach to delivering high-performance industrial solutions"

MULTI MITRA GUNA

OUR SERVICES

Instrumentation and SCADA

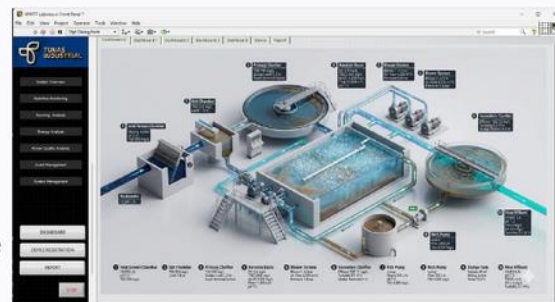

MMG is a premier automation and SCADA (Supervisory Control and Data Acquisition) systems integrator. We specialize in helping manufacturing, process, utility, and infrastructure industries optimize their operations through precise control, seamless digital integration, and real-time data visibility.

With a dedicated team of multi-disciplinary engineers proficient in both Operational Technology (OT) and Information Technology (IT), we bridge the gap between plant floor machinery and enterprise-level decision-making systems. We transform raw industrial data into actionable operational intelligence

Our SCADA and automation architectures are engineered to scale across various critical infrastructure and process sectors:

- **Water & Wastewater Treatment (WTP / WWTP):** Automated filtration sequences, chemical dosing loops, submersible pump control, equalization tank monitoring, and remote lift station telemetries.
- **Process & Batch Manufacturing:** Production line synchronization, raw material batching (ISA-88), critical interlock monitoring, and asset uptime optimization.
- **Energy & Building Management Systems (EMS):** Industrial HVAC control, plant utilities tracking, and sub-station power monitoring.

- **Multi-Brand Expertise:** We maintain an agile, vendor-neutral engineering team capable of programming and modifying a wide array of legacy and modern hardware/software ecosystems.
- **Safety & Security First:** From hardwired safety interlocks to cyber-hardened network switches, we protect your plant personnel, machinery, and intellectual property.
- **Continuous Support Ecosystem:** We offer dedicated hyper-care support immediately post-turnover, backed by customizable annual Service Level Agreements (SLAs) for 24/7 peace of mind.

ELECTRO-MECHANICAL ENGINEERING

3

In mechanical design, equipment analysis, and system optimization, we ensure efficiency, precision, and compliance in engineering projects, spanning various industries with comprehensive solutions.

Mechanical Engineering Design

From CAD modeling to FEA, we ensure accurate designs for production, incorporating 3D rendering and motion animation.

Equipment Design and Analysis

Compliant designs and optimized performance through meticulous calculations and adherence to industry standards.

System Design and Plant Layout

Efficient designs for hydraulic systems, water treatment plants, and production layouts ensure operational excellence and efficiency.

MULTI MITRA GUNA

CAPABILITIES

Smart Automation & Digital Integration

Intelligent Control & Connectivity Sub-headline: Bridging the gap between hardware and smart industrial operations.

- PLC Programming: Custom logic development for seamless machine automation and process synchronization.
- Intuitive HMI Design: User-centric touch-panel interfaces that provide real-time visualization and simplified operator control.
- Data & IoT Integration: Enabling remote monitoring, data logging, and integration with SCADA or ERP systems for Industry 4.0 readiness.
- Fault Diagnostics: Implementing advanced error-reporting systems to minimize downtime and accelerate troubleshooting.

MULTI MITRA GUNA

OUR EXPERIENCES

Production Line Design

End Pipe Coating Process Line

specialized system designed for coating the ends of pipes, enhancing their durability and performance in various industrial applications.

Coupling Painting Line

specialized system used to apply paint uniformly to couplings, enhancing their appearance and protecting against corrosion

Customized Equipment & Machine Design

Pipe Conveyor System Assy

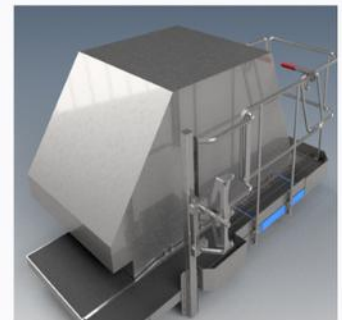

Pipe Conveyor System Assy: Integrating pipes for efficient material transport in mechanical engineering applications.

Industrial Platform Design

Platform Design in mechanical engineering entails creating structures for support or access in industrial environments.

We are following AISC Standard Code, Government Regulation, Etc.
